Statement

We hereby certify that during manufacture of

ZYTEL[®] nylon resin (flame retardant grades)

no arsenic (As), barium (Ba), beryllium (Be), cadmium (Cd), hexavalent chromium (Cr^{VI}), cobalt (Co)[#], copper (Cu)^{*#}, lead (Pb), manganese (Mn)[#], mercury (Hg), molybdenum (Mo), nickel (Ni), selenium (Se), silver (Ag), tin (Sn), zinc (Zn)[#] or compounds thereof are added.

To the best of our knowledge, our raw material suppliers do not use the above substances in the manufacture of their products. However, we do not routinely analyse our films for the above substances nor do we require our raw material suppliers to do so.

Therefore we are confident that, if present at all, the levels of cadmium (Cd), hexavalent chromium (Cr^{VI}), lead (Pb) and mercury (Hg) are below the 1994 CONEG guide-lines of 100 ppm, the limits of the European Directive 94/62/EC (Packaging Waste Directive) of 100 ppm as well as the European Directive 2000/53/EC (ELV)⁺ – 100 ppm/1000 ppm of unintended trace levels and the European Directives 2002/95/EC (RoHS) / 2002/96/EC (WEEE) of 1000 ppm.

Antimony (Sb) compounds are added as part of the flame retardant system. Please consult the Safety Data Sheet for the amounts present.

* heat stabilised grades contain low levels of copper (Cu).

pigments in coloured grades may contain traces of cobalt (Co), copper (Cu), manganese (Mn), zinc (Zn).

⁺For other substances relevant to this Directive, please consult the European Safety Data Sheets, section 15.

A handwritten signature in black ink, appearing to read "R. Kurzknabe".

Rainer Kurzknabe
Regulatory Affairs Programs Manager

This statement is based on our current level of knowledge and covers commercial and experimental resins as supplied by DuPont at the date of issue. Since conditions of use are outside DuPont's control, DuPont makes no warranties, express or implied, and assumes no liability in connection with any use of this information.
