**Declaration with regard to directive 2002/95/EC
Hazardous substances in electrical and electronic equipment “RoHS directive”**

Product : Ryton™ and Xtel™

All Ryton™ PPS and Xtel™ products, as supplied by Chevron Phillips Chemicals Int. are normally expected to contain less than 10 ppm Chromium, and less than 1 ppm Lead, Mercury, Cadmium, PBBs and PBDEs. None of these substances are intentionally introduced as additives into any Ryton™ PPS or Xtel™ products, and these substances may only be present as adventitious impurities in the products.

Confirmed by :

A handwritten signature in blue ink, appearing to read 'K. Reynders', is written over a horizontal line.

Karen Reynders
Quality Assurance & Testing Supervisor
