WEEE – EU-Directive 2002/96/EC:

WEEE = Waste on Electrical and Electronic Equipment

RoHS – EU-Directive 2002/95/EC:

Restriction of the use of certain Hazardous Substances in electrical and electronic equipment

EU-Directive 2003/11/EC:

Restriction of Pentabromodiphenylether and Octabromodiphenylether

Dear Ladies and Gentlemen,

We certify that the above mentioned products do not contain the dangerous substances restricted by article 4 of RoHS-Directive:

We confirm that the formulation of our products do not contain the heavy metals Lead, Cadmium, Chromium-VI, Mercury and their compounds. None of the substances were detected at detection limits well below those of 2005/618/EC.

In accordance with the self commitment of the plastic manufacturing industry in 1986 we do not use Polybrominated Biphenyls (PBB) and Polybrominated Diphenylethers (PBDE) in the above mentioned products. Since this includes Pentabromodiphenylether and Octabromodiphenylether these products also comply with EU-Directive 2003/11/EC.

The above mentioned grades do by constitution **not contain any DECABROMODIPHENYLETHER**. Therefore it is in accordance with the new decision of EuGh (European court of justice) that forbids the use of Decabromodiphenylethers in polymeric applications.

The WEEE-Directive regulates disposal and recycling of electrical and electronic waste. Compliance with the restrictions of that Directive can only be confirmed by the producer of the final product.

However, for the above mentioned products of TICONA we confirm that they do not contain any substances listed in Annex II of this directive (2002/96/EC).

The presence of trace amounts cannot be excluded.

This product information is machine-printed and will not be signed.

Ticona GmbH
